

JOB OPENING

The Department of Industrial Engineering at the University of Chile, is seeking to fill two academic positions in operations management and operations research.

The successful candidates will join a leading research body in ORMS with strong international connections to prestigious academic centers. Our faculty performs world-class research, which is published in top tier journals, and that has received prestigious awards including the IFORS Prize, the INFORMS Edelman Prize, and the TSL Best Paper Award. The Department has vast and recognized experience in developing innovative projects for private companies and government agencies, e.g. in the areas of applied combinatorics, forest engineering, mining, retail, decision support systems, and data mining.

According to a ranking carried out by the journal Interfaces, the Department is the highest-ranked academic institution in applied operations research outside of the United States. More information on our activities can be found on our website at:

<http://www.dii.uchile.cl/cgo/>

As part of the Engineering School of the University of Chile, the most important science and engineering center in the country, the Department holds a leadership position as Chile's principal training institution for industrial engineers, with high-quality graduate programs and research centers in various areas of management and engineering.

Duties include conducting frontier research and development of impact projects, as well as teaching at undergraduate and graduate courses (in Spanish; after the first year for non-Spanish speaking candidates).

Candidates are expected to hold a doctoral degree in operations management, operations research or similar fields. The salary is competitive and will be commensurate with the candidate's qualifications.

APPLICATIONS INCLUDING C.V. AND LETTERS OF RECOMMENDATION SHOULD BE SENT TO:

Richard Weber
