

2013 *Management Science* Service Awards

The success of *Management Science* critically depends on the community of scholars who voluntarily contribute their time to provide thoughtful reviews of the manuscripts submitted to the journal. The workload is considerable: In the 2013 academic year (July 2012 through June 2013) *Management Science* received 3,798 reports from 2,306 individuals. Furthermore, the majority of those reviews were received on or before the due date, helping us to nearly reach our goal of completing 90% of our decisions within 90 days.

While we deeply appreciate the service of all those who contribute to our journal, to recognize the importance of the manuscript evaluation process to the *Management Science* community, the Editorial Board grants annual service awards to those Associate Editors and reviewers who offer meritorious or even distinguished service.

Not only do Associate Editors read manuscripts, but they recruit reviewers, read their reports, and write recommendations to the Department Editors. All of our Associate Editors are dedicated to the journal, but some are notable for handling a significant number of manuscripts and ensuring a reasonable time between when they are assigned a paper and when they return their recommendation. We recognize them with our Meritorious Service Award or, for those who clearly distinguish themselves along both of those dimensions, our Distinguished Service Award.

As with our Associate Editors, the service of reviewers is critical for the journal. Some graciously agree to review many manuscripts and then consistently write timely, unbiased, and thoughtful reports. We are pleased to grant them our Meritorious Service Award or, for those who demonstrate a remarkable commitment to the journal in each of those attributes, our Distinguished Service Award.

The *Management Science* Distinguished Service Award recipients for the 2013 academic year are as follows:
